

Database migration assessment report

Source database: sctuser@dnvqa2dbpepp1.corp.nai.org:1521/srvqadb
Oracle Database 11g Enterprise Edition 11.2.0.3.0 (64bit Production), Enterprise edition

Executive summary

We completed the analysis of your Oracle source database and estimate that 99.9% of the database storage objects and 97% of database code objects can be converted automatically or with minimal changes if you select Amazon RDS for Oracle as your migration target. Database storage objects include schemas, tables, table constraints, indexes, types, collection types, sequences, synonyms, view-constraints, clusters and database links. Database code objects include triggers, views, materialized views, materialized view logs, procedures, functions, packages, package constants, package cursors, package exceptions, package variables, package functions, package procedures, package types, package collection types, scheduler-jobs, scheduler-programs and scheduler-schedules. Based on the source code syntax analysis, we estimate 100% (based on # lines of code) of your code can be converted to Amazon RDS for Oracle automatically. To complete the migration, we recommend 3,944 conversion action(s) ranging from simple tasks to medium-complexity actions to complex conversion actions.

License evaluation and cloud support

Your Enterprise server has the following features turned on: Tuning Pack.

If you want to move this database to Standard Edition, you need to remove dependencies on these features: Advanced Compression, Bitmapped index, bitmapped join index, and bitmap plan conversions, Materialized View Query Rewrite, Partitioning.

Your source server has some features turned on that can't be moved to RDS: Automatic Storage Management.

Database objects with conversion actions for Amazon RDS for Oracle

Of the total 11,063 database storage object(s) and 20,873 database code object(s) in the source database, we identified 11,062 (99.9%) database storage object(s) and 20,292 (97%) database code object(s) that can be converted to Amazon RDS for Oracle automatically or with minimal changes.

We found 1,413 encrypted object(s).

1 (0.1%) database storage object(s) require 1 complex user action(s) to complete the conversion.

581 (3%) database code object(s) require 265 complex user action(s) to complete the conversion.

Oracle Database 11g Enterprise Edition 11.2.0.3.0 (64bit Production), Enterprise edition

If you migrate your Oracle database to Amazon RDS for Oracle, we recommend the following actions.

Storage object actions

Database link Changes

Not all database links can be converted automatically. You'll need to address these issues manually.

– Issue 1511: Unable to set custom owner for private database link

Recommended action: Owner of private DBLink is always current user. Please connect as necessary user and create link manually.

Issue code: 1511 | Number of occurrences: 1 | Estimated complexity: Complex

Schemas.FND_SERVICE.Database Links.SEARCH

Type Changes

Not all types can be converted automatically. You'll need to address these issues manually.

! Issue 1500: Wrapped object is migrated AS IS

Recommended action: Please, check that the target system meets dependencies and required privileges.

Issue code: 1500 | Number of occurrences: 211 | Estimated complexity: Simple

Schemas.CTXSYS.User Defined Types.CATINDEXMETHODS
Schemas.CTXSYS.User Defined Types.RULEINDEXMETHODS
Schemas.CTXSYS.User Defined Types.TEXTINDEXMETHODS
Schemas.CTXSYS.User Defined Types.TEXTOPTSTATS
Schemas.CTXSYS.User Defined Types.XPATHINDEXMETHODS
+206 more

Code object actions

Package procedure Changes

Not all package procedures can be converted automatically. You'll need to address these issues manually.

! Issue 1700: Unsupported Built-in Object

Recommended action: Try to replace the reference to the object manually.

Issue code: 1700 | Number of occurrences: 667 | Estimated complexity: Simple

Schemas.MDSYS.Packages.SDO_RELATE_MASK.Public procedures.DELETE_MASK: 83:89
Schemas.MDSYS.Packages.SDO_RELATE_MASK.Public procedures.DELETE_MASK: 123:130
Schemas.MDSYS.Packages.SDO_RELATE_MASK.Public procedures.DELETE_MASK: 132:135
Schemas.MDSYS.Packages.SDO_RELATE_MASK.Public procedures.DELETE_MASK: 144:148
Schemas.MDSYS.Packages.SDO_RELATE_MASK.Public procedures.DELETE_MASK: 273:280
+662 more

– Issue 1701: AWS RDS doesn't support Java stored objects
